## Summary

---

An industrial engineer for almost 5 years and a freelance video editor for nearly 4 years. With a year of studying programming, expertise lies in HTML, CSS, and JavaScript. The idea of using programming to create experiences that amaze users is particularly exciting. Described as dedicated, detail-oriented, and creative. In my free time, I enjoy watching movies, series, or anime, with "Interstellar" and "Breaking Bad" being among my favorites. I also like to ride my bike in the afternoons or play video games.

## Work Experience

---

### Freelance Editor de Videos

Mexico (Remote)

Video Editor

Sep 2019 - Present

- Participated in projects ranging from editing promotional videos for content creators on social media platforms like YouTube and Instagram. Over this time, faced challenges such as learning new techniques and tools independently to improve video editing and handling client interactions.

*Skills: Adobe Premiere Pro, After Effects, PhotoShop*
